Code	Price
M46481	Tub

### HELPFUL INFORMATION

It is important to prevent cross infection by cleaning items used by more than one patient/client in between use. Handy and portable antibacterial wipes are an easy way to keep surfaces of equipment clean and disinfected around the home, hospital or school.

## Sanitisers & Wipes

### Introducing Supernova®

#### Alcohol Free Infection Prevention

Supernova® is independently proven to kill 99.99% of bacteria, spores, viruses and moulds on contact. Its **alcohol-free** formulation kills bacteria and delivers a long lasting disinfection and biological cleanliness to hands and surfaces safely and instantly. Supernova® exceeds European test and safety standards giving assurance of protection against infection including C-difficile, Norovirus and MRSA. Fragrance free and instantly ready to use - no water required. Supernova® displays residual surface activity up to 72 hours after application\*. Supplied in a range of options designed to protect both hands and surfaces, such as commodes, beds, mattresses, toilets, chairs, work surfaces etc.

- Supernova® is alcohol-free which means it kills spores and viruses such as *Clostridium difficile* and Norovirus
- Supernova® is proven effective against 99.99% of spores, bacteria, fungi and viruses including the Swine Flu H1N1 virus and MRSA
- Supernova® exceeds European standards EN1276; EN13704; EN1650; EN14476; EN1500
- Supernova® is fragrance free and instantly ready to use, its no water formulation provides instant germ protection

**NEW**

#### HELPFUL INFORMATION

##### Choosing An Alcohol Free Infection Prevention Solution - The Benefits

Alcohol gels do not kill spores or non-enveloped viruses. Supernova® is effective against spores and viruses such as *Clostridium difficile* and Norovirus. Alcohol gels often contain in excess of 70% alcohol which can irritate skin. Prolonged use of alcohol based products can damage materials such as plastics, rubber and metals. Alcohol gels are flammable (and can be used as a way of inflicting damage to people or property).

**Kills C-diff**

**Supernova® displays residual surface activity up to 72 hours after application\***

#### Supernova® Hand Protection:

Supernova®'s foam based alcohol free formulation means it won't dry or crack hands. Provides long lasting germ protection from 99.99% of bacteria, spores, viruses and fungi including C-diff, Norovirus and MRSA.

##### 1 Supernova® Mini Hand Foam - 50ml Pump Bottle

Each 50ml bottle provides up to 125 applications.

Code	Price
M46341	Each

##### 2 Supernova® Hand Sanitising Foam - 600ml Pump Dispenser

Each 600ml bottle provides up to 400 applications.

Code	Price
M46353	Each

#### Supernova® Surface Protection:

Supernova® provides long term protection to surfaces and equipment. Ready to use and alcohol free, it leaves surfaces biologically cleansed and sanitised in seconds. Because it's alcohol free it will not damage the integrity of the surface it's applied to. Provides long lasting germ protection from 99.99% of bacteria, spores, viruses and fungi.

##### 3 Supernova® Large Surface Wipes

Suitable for sanitising large surfaces and equipment. Supplied in easy to dispense, airtight, portable tubs. 200 wipes per tub.

Code	Price
M46365	Each

##### 4 Supernova® Surface Sanitising Spray – 1 litre bottle

Suitable for large surface coverage and hard to reach areas. Supplied in 1 litre (35fl.oz) trigger spray bottle.

Code	Price
M46377	Each

##### 5 Supernova® Personal Pack

A sanitising Personal Pack containing 50ml (1.8fl.oz) Mini Hand Foam for instant hand cleansing and a pack of 25 Active Wipes for sanitising surfaces. Handy transparent waterproof bag.

Code	Price
M46389	Each

\*There are many variables involved including bacteria type and concentration, activity to remove and disturb the residual film, temperature, surface material and application method of Supernova®. It is advisable not to rely on a 72-hour activity and to apply more frequently where required but a level of protection is still offered.
