New **Cobi Rehab Bariatric Range** Now Available

Beechfield Healthcare are the distributors of the Cobi Rehab Bariatric range, formerly known as XXL Rehab. The new Cobi range is full of products designed specifically for bariatric patients, supporting their bodies movement throughout the day with independency and comfort. We have a variety of new stock to help you increase your patient's mobility including Rollators, Walking Frames, Canes, Crutches Wheelchairs, commodes, shower benches and slings.

Cobi Rehab Stand Tall

PRODUCT CODE: 0780-076-000

KEY FEATURES

- This is a multi-functional bariatric aid with a maximum weight capacity of 325kg.
- It can be used for walking, mobilising from seated to standing and has an IV option. IV sold separately.
- 2 built in hand grips give extra safety to the user and minimises the risk of falling.
- Under-arm padding is width adjustable and the angle can be adjusted to allow optimal support.
- Brakes can be locked for added stability during transfers from seated to standing.

The Cobi Rehab Stand Tall has 2 built-in hand-grips on the side which allow the user to stand up in small steps from the bed or chair being in full control of the situation. This minimises the risk of falling and therefore also minimises the risk of injury to caregiver or patient himself. Once upright the user can walk around.

The underarm-padding is adjustable in width and angle giving optimal support to the user. This function is supported in full length of the bar. In addition, it has many hand-grip combinations and easy adjustment, everything to make the Cobi Rehab Stand Tall easy to maneuver.

The brakes are mounted onto the bar, useful in stops of course, but also in speed control and turning: the Cobi Rehab Stand Tall is a safe zone. The brakes can be locked, i.e. when getting up/sitting down. Using 32 mm tubing ensures an almost forever lasting frame, but also gives a much more simple look and it can be cleaned in few seconds.

The Cobi Rehab Stand Tall is mainly designed for use in nursing homes and in hospitals. IV holder and holder for urine-bag are optional.

Cobi HD Electric Wheelchair

CODE: 0500-072-000

The Cobi HD Electric Wheelchair has a heavy-duty construction with upgraded in-line dual motors and a reinforced frame for maximum durability. The wheelchair also offers solid springs on the front anti-tip.

The electric wheelchair is simple and easy to use and many adjustments are possible to ensure a high degree of comfort. The wheelchair is equipped with the seating system "Synergy" which, among other things, can grow in both width and depth. The wheelchair has superb maneuverability with a turning radius of only 131 cm. The patented mid-wheel drive design together with 16" drive wheels and 9" caster wheels provide unique stability for the user.

Max Weight Capacity of 295kg (46.5st).

Cobi Transporter

CODE: 0182-071-000

The Cobi Transporter is designed for easy indoor transport inside hospitals and care homes and is easy to disinfect. The basket under the chair is made so that belongings etc can follow the patient during transit.

It is designed for easy access, independence, safety. The 24" rear wheels provide more directional stability and smooth pushing. The inside width of the Cobi Transporter is 71 cm, but using a 5 cm high PU foam seat and 7 cm free space to the armrests allows the body mass to fall down, instead of fading out to the sides. The impossible "wide inside but small outside" is obtained.

Max Weight Capacity of 325kg (51st).

Cobi Rollator King

CODE: 0172-050-000

The Cobi Rehab Rollator King is designed to Bariatric users and has a large support surface that reduces the risk of accidents. The rollator has feather touch hand brakes that provide superior control and ensure the walker is easy to manoeuvre and holds the weight.

The rollator comes with a basket and the handles are fitted with reflectors. It is extremely strong, stable, lightweight and easy to fold. The Rollator King is designed to fit through doorways and into cars. The new design with iron forks and wide tires gives a smoother drive and safe handling experience.

Maximum weight capacity of 325kg/ 51st

Cobi Rollator Support

CODE: 0173-050-000

The Cobi Rehab Rollator Support is designed to Bariatric users and has a large support surface that reduces the risk of accidents. The rollator has feather touch hand brakes that provide superior control and ensure the walker is easy to manoeuvre and holds the weight.

The underarm support helps to walk in a more upright position and minimize stress on wrist. The rollator comes with a basket and the handles are fitted with reflectors. It is extremely strong, stable, lightweight and easy to fold. The Rollator Support is designed to fit through doorways and into cars.

Maximum weight capacity of 200kg/ 31.5kg

Cobi Bariatric Walking Frame

CODE: 0130-07

Heavy duty walking frame designed specifically for bariatric users. This frame is foldable and available in 2 widths, with ferrules or with 2 wheels in front. With 2 wheels in front the walking frame is easy to manoeuvre and roll across the floor. The 2 rear legs ensure that walking frame does not suddenly roll away if the user for example loses balance.

The walking frame is lightweight but solid and offers a high degree of stability. It has padded handles and the height can easily be adjusted from 76-101 cm without tools. The Cobi Rehab Bariatric Walking Frame is specially designed for users up to 270kg / 42 stone.

Available in 74cm and 84cm width and with or without wheels

Cobi Rehab Crutch & Canes

The Cobi Bariatric Crutch is height adjustable with a universal grip and features a new carbon design. Exclusively made for bariatric users weighing up to 325kg (51st).

The Cobi Extra reinforced cane is exclusively designed for bariatric users weighing up to 270 kg. The curved neck places the users weight directly over the shaft for stability and safety. The cane has a vinyl handle and double push-button for adjustment of height.

The Cobi Rehab 4-Point cane has an adjustable handle and large double push-buttons for adjustment of height. The 4-point base increases the stability. Exclusively designed for bariatric users weighing up to 270 kg.

Electric Shower Commode

CODE: 155-066-000

The Cobi Rehab Shower Commode Electric Tilt has a 32 degree tilt position and a weight capacity of 325kg Safe Working Load. This shower commode is designed to provide a comfortable alternative showering system in instances where the prone position might cause discomfort or distress to the user. It may also be used in circumstances of limited space providing a bathing solution where other units may not have room for operation.

The high backrest and sturdy armrests provide optimum user support and security. The reclined position gives full access for the caregiver to most parts of the body and is very comfortable for the user. Ideal for use with users with reduced muscle tone, Pressure sores, Spasm / involuntary movements, Amputations & Stroke.

Shower Commode Wheeler

CODE: 152-061-000

The Cobi Rehab Shower Commode Wheeler is available in 61 or 71 cm seat widths, with a 5cm high PU foam seat and 7 cm free space to the armrests allows the body mass to fall down, instead of fading out to the sides.

The footrests are side & width adjustable for access to intimate hygiene, this allows people with the fat-tissue placed on the inside of their leg to sit with their legs apart (up to 110 cm) and still have foot support. Features a split toilet seat, a long open hole: 44 cm and 22 cm at the widest point to give access to caregivers.

Max Weight Capacity of 325kg (51st).
Available in 68cm and 78cm widths

Cobi Shower Commode

CODE: 150-061-000

The Cobi Shower Commode is designed for easy access, independence and safety.

The footrest are side/width adjustable, so access to intimate hygiene is possible and people with the fat-tissue placed on the inside of their leg can sit with legs apart (up to 110 cm) and still have foot support. The space between backrest and seat has a clearance of 32 cm. This gives space for a possible bulbous gluteal region, but also enables the caregivers to reach for the sling and position the user better.

Max Weight Capacity of 325kg (51st).
Available in 61cm and 71cm widths

Cobi Bedside Commode

CODE: 1442-061-000

Strongly engineered and functionally designed for bariatric users. The unique butterfly armrests ensure the body doesn't get squeezed, getting in and out the chair. The height of the chair is adjustable from 44 to 59cm to maximise the ability to get in and out of the chair. The backrest can be moved +/- 6 cm and the bended tubing assures that the right comfort can be found.

Features a tool free removable seat pad and the bedpan is redesigned for a smoothly hygienic cleaning operation.

Max Weight Capacity of 325kg (51st).
Available in 61cm and 71cm widths

Better Equipment, Better Outcomes,

Better Living

Cobi Minimaxx

CODE: 0100-056-000

The Cobi Minimaxx folds up easily and is easy to bring along. The folding system is very easy to activate, and gives at the same time great support to the seat. The design of the folding system makes the chair rigid – when unfolded the chair is also much more stable than normal foldable chairs.

The Cobi Minimaxx drives very well due to the position of the rear and front wheels. It is designed so the rear wheels carry most of the user's weight making it much easier for the user to push. The castor wheels are further in front as on standard chairs. This prevents the chair from tipping.

Max Weight Capacity of 325kg (51st).

Available in 56cm/ 61cm/ 66cm and 71cm widths

Minimaxx With Push Motor

CODE: 0110-056-000

The Cobi Minimaxx With Push Motor is a strong power pack that assists the attendant to push the chair with no effort. It is now easy to move a bariatric patient around. With the Minimaxx With Push Motor the caregiver avoids sore shoulders and stress on wrists.

Even on slopping surface up to 5 % the push motor helps over you over the top and going down you find the security of our disc braking system. If an immediate stop is needed just pull the lever and the wheelchair stops at once.

Max Weight Capacity of 325kg (51st).

Available in 56cm/ 61cm/ 66cm and 71cm widths

Cobi Eclipse Wheelchair

CODE: 0120-050-000

The construction and adjustment possibilities meet the needs from various bariatric body-types, making it the best for this type of user. The steel frame gives the Cobi Eclipse wheelchair maximum strength and rigidity, and therefore also makes it a long lasting wheelchair.

The frame is designed so most of the user weight is carried on the rear wheels. The wheels are especially made for this wheelchair; they are extra hard and solid making propulsion and steering unbelievably easy and with very little loss of energy

Max Weight Capacity up to 450kg (71st).

Available in 50cm / 55cm/ 61cm/ 66cm / 72cm / 82cm / 92cm / 102cm and 112cm widths

Cobi Eclipse Tilt Wheelchair

CODE: 0121-050-000

The steel frame gives the Cobi Rehab Eclipse Tilt Wheelchair maximum strength and rigidity. The frame is designed so most of the user weight is carried on the rear wheels. The seat pan is solid, giving a bariatric user a solid seat pan facilitates a good posture and activeness in the chair. The Eclipse Tilt Wheelchair has adjustable seat depth, seat height, seat to floor angle and seat to back angle. All of this makes it easy to adjust to any user.

The back is constructed so users with a protruding behind can get good support to their lumbar spine. The front wheels are placed in front of the seat pan to ensure an anterior anti-tip, this also assists the user to get in and out of the wheelchair without the risk of tipping.

Max Weight Capacity of 270kg (42.5st).

Approved Supplier

Cobi Patient/Dinner Chair

CODE: 0160-061-000

The butterfly armrests of the Cobi Patient/Dinner chair provide much better functionality for the user, compared to other chairs with straight and short armrests where it is almost impossible for a bariatric user to get a good grip. The backrest can be moved +/- 6 cm and the bended tubing assures that the right comfort can be found.

The height of the chair is adjustable from 44 to 59 cm and the armrests are constructed so they go beyond the seat. This makes it easy both to get a good grip when a person wants to sit down but also to get up again.

Max Weight Capacity of 325kg (51st).
Available in 61cm and 71cm widths

Cobi Viscocomfort Cushion

CODE: 0233-056-050

The Cobi Viscocomfort cushion is made from an 11cm molded base of firm foam with a 3 cm Viscoelastic foam on the top.

The molded base provides increased stability and seat support and provides unique pressure relief on the Tuber Ischii.

The cushion is 14 cm high and has a 2 way stretch vapour permeable incontinence and flame resistant cover.

Max Weight Capacity of 325kg (51st).

Available in the following sizes (W x D x H): 50x50x14cm / 61x50x14cm / 66x50x14cm / 71x50x14cm / 81x50x14cm / 91x50x14cm / 96x50x14cm and 100x50x14cm

Wheelchair Comfort Cushion

CODE: 0230-055-065

This cushion is developed exclusively for bariatric users who need prophylaxis that lasts over a longer period.

The cushion is made of viscoelastic foam on the top and springs cut into the under base of foam. The patented system of springs distribute the pressure to a larger surface and assure pressure relief.

The cushion is 12 cm high and has a 2 way stretch vapour permeable incontinence. It features a washable, fire retardant incontinence cover.

Max Weight Capacity of 325kg (51st).

Available in the following sizes (W x D x H): 55x45x12cm / 61x45x12cm / 66x45x12cm / 72x45x12cm and 82x45x12cm

H2O Cushion For Wheelchairs

CODE: 0234-061-050

H2O Wheelchair cushion that is designed for pressure relief up to stage 4. The pressure relieving wheelchair cushion has two water cells that ensure high pressure relief with good pressure distribution and stability. Water technology helps the temperature regulating effect and increases blood flow in the tissue. Thus, the user achieves better circulation, better healing and increased comfort. The amount of water is carefully matched to the size of the cushion. The weight of the elements varies depending on the size of the cushion and this ensures optimum seating comfort and pressure distribution without compromising stability.

Max Weight Capacity of up to 270kg (42.5st).

Available in the following sizes (W x D x H): 61x50x10 / 66x50x10 and 71x50x10

Cobi Rehab 400 Electric Hospital Bed

PRODUCT CODE: 2314-120-220

KEY FEATURES

- Modern bariatric electric bed for bariatric users up to 400kg / 62st.
- This bed is designed to accommodate the needs of both the user and the caregiver with both length and width adjustable functions.
- Adjustments can be made manually to allow comfort for multiple users.
- The sturdy frame is constructed with a central braking system and directional wheel control.
- Separate controls for the caregiver including Trendelenburg and anti-Trendelenburg.
- Caregiver also has optional lock function to prevent misalignment in the bed.
- Bed rails, lifting poles and IV poles are also available to purchase and can be fitted and removed without the need for tools.
- Suitable for mattress length 200cm – 220cm and width 90cm – 100cm – 120cm

Modern bariatric electric bed for bariatric users up to 400kg / 62st. This bed is designed to accommodate the needs of both the user and the caregiver with both length and width adjustable functions. Trendelenburg and anti-Trendelenburg function.

Cobi Alternating Mattress

CODE: 0244-100-200

The Cobi Rehab Alternating mattress is for users with a history of pressure sores, with the risk of developing new pressure sores or with existing pressure sores up to grade 4. The mattress is controlled by a microprocessor run pump which works in an A-B cycle. The cycle time is adjustable 10, 15, 20, 25 minutes. Combined with a cell height of 21 cm it is possible to both relieve and distribute the load.

The mattress holds different functions such as “firm”. Activating “firm” makes the mattress evenly hard for 20 minutes. After 20 minutes it returns to alternating. This function makes it much easier to either facilitate transfer, training or help in nursing situations. The pump is almost silent due to the microprocessor run pump. It also holds an alarm function for power supply, malfunction and in case of air loss – the alarm is both visual and audible.

Max Weight Capacity of 270kg (42.5st).

Cobi Comfort Foam Mattress

CODE: 0240-100-200

The Cobi Comfort foam mattress is a standard mattress which works perfectly with nursing beds. The mattress secures a soft but still effective distribution of the load combined with a unique stability that helps the user to obtain the ability to reposition himself/herself.

The bottom of the mattress consists of a 15 cm layer of heavy duty PU foam cut into springs. This feature secures a lower “push back” effect on the user and at the same time ensures an air flow within the mattress. On top of the 15 cm PU foam lies a 3 cm layer of viscoelastic foam. This layer ensures maximum adaption to the surface & pressure relief up to grade 2.

Max Weight Capacity of 325kg (51st).

Available in 200 x 100cm (LxW) or 220 x 120cm (LxW)
