Max Safe Working Load <b>226kg (35.5st)</b>	Max Safe Working Load <b>226kg (35.5st)</b>

## Features:

- » The Alpalite is a four section electrically profiling community bed, designed and manufactured by our bed experts in Halifax, Yorkshire. UK.
- » Quick and simple assembly, designed for single person installation.
- » All sections of the bed are below 25kg for safe manual handling and simple assembly.
- » Slatted bed platform for easy cleaning, improved infection control and durability.
- » Built-in Auto regression function designed to increase patient comfort, reduces abdominal pressure and minimises shear and friction forces on patients. The auto-regressing backrest mimics the natural spinal movement of a patient when profiling the bed.
- » Reverse Trendelenburg function to assist and improve blood circulation to the lower body and improve respiration.
- » Cardiac chair position providing a more comfortable sitting position for patients, allowing them to self-feed and enabling a better view of the surroundings. Creates easier patient positioning to assist with eye to eye care.

**Slatted bed platform for improved infection control**

**Unique patented dipped side rail design**

- » Patented integral full length side rails designed with a stepped down section for easy patient egress and ingress; preventing any excess pressure on the back of the legs whilst moving in or out of the bed.
- » Intuitive and easy-to-use 9 button handset. The lightweight handset can be locked-out to ensure vulnerable patients' safety.
- » Available in standard and low height options
- » 5-year warranty as standard
- » Full compliance to EN60601-2-52 and EN60601-1-11.

## Accessories:

- » Can accommodate taller patients with an optional bed extension, which is quick and easy to install.
- » A range of optional side rails are available for complete in bed safety.
- » IV/lifting pole socket is available as an accessory.
- » Full range of supporting accessories and spare parts are available.

**Bed extension**

**9 button handset**
