Nevada Riser Recliner Chair - 40cm / 46m / 51cm

The Nevada in Vinyl Rise & Recline Armchair is one of our best sellers as it features a dual motor mechanism allowing you to operate and move the leg-rest and the backrest independently.

This provides countless recline options, helping you to find your most comfortable position. The Nevada allows you to relax with ease at the simple touch of a button, or alternatively it will gently lift you into a standing position.

KEY FEATURES

- The footrest can be elevated and the backrest can be reclined independently. It will rise and tilt, helping you to your feet.
- Easy to use electronic four button hand controller that provides countless recline positions.
- The Anti-Microbial PVC fabric helps reduce build up of harmful bacteria such as MRSA and has been tested to BS 5852 ignition source 5 (Crib 5) making it ideal for nursing and care home environments. The easy to clean PVC has passed the Anti-Microbial standard ASTM G-21-96 and is easy to wipe clean for improved infection and hygiene control
- Medium grade memory-foam seat upholstery helps distribute pressure and the ergonomically contoured seat and back enhances comfort
- Three-tier waterfall pressure redistribution back design provides extra support
- Two motors enable leg-rest to be elevated and lowered and backrest to be reclined independently to give more flexible support options
- Backrest reclines almost fully to an excellent snooze position and can be stopped at any required position to suit
- Built-in convenient side pockets enable storing of items close-to-hand
- Safety key function prevents accidental movement and potential entrapment of children/pets
- Includes battery back up facility to enable chair to be brought to its normal position during power failure*

ON CONTRACT FOR PRESSURE REDISTRIBUTION
CUSHION - MEMORY FOAM - AT RISK

KEY FEATURES

- High frequency welded seams and a fully concealed zip reduces the possibility of fluid ingress and aids infection control
- Multi stretch PU cover is waterproof, vapour permeable and impregnated with Acti-fresh biocide to help prevent the build up of bacteria and ensure it can be easily cleaned to aid disinfection protocols
- White inner substrate (underside of the cover) helps auditing procedures by making staining easy to identify
- Cover can be completely removed and laundered up to 80°C to aid decontamination protocols
- Temperature sensitive visco-elastic foam moulds to the shape of the body providing greater weight distribution & pressure reduction
- 2 year warranty

	Memaflex
Height of Cushion	7.6cm
Depth & Width	16" x 16" / 17" x 17" / 18" x 18" / 20" x 18"

Memaflex pressure redistribution memory foam cushion designed for at risk patients. Features a multi stretch PU cover that is waterproof and vapour permeable. Features high frequency welded seams and a fully concealed zip and the cover can be completely removed and laundered. The white inner substrate makes staining easy to identify.

Air Layer Cushion

PRODUCT CODE: 2002140026

#2 ON CONTRACT FOR PRESSURE REDISTRIBUTION CUSHION - MEMORY FOAM - AT RISK

KEY FEATURES

- Microclimate Management - Air-Layer
- Anti-Microbial Coating
- Visco-Elastic Foam
- Welded Seams
- Multi-stretch Cover
- Water resistant Cover
- High Specification Foam with a vapour permeable Cover
- 2 year warranty

When seated the risk of skin breakdown on the buttocks is reduced if the patient's microclimate is controlled and pressure is distributed.

The Air-Layer cushion features a block of visco-elastic foam that conforms to the buttocks redistributing pressure and an 'Air-Layer' to reduce heat transfer.

The cover is waterproof, multi-stretch and vapour permeable with welded seams to reduce the risk of fluid ingress.

	Air Layer
Height of Cushion	7.6cm
Depth & Width	16" x 16" / 17" x 17" / 18" x 18" / 20" x 18"
Weight Capacity	167kg
Pressure Redistributing Foam	Yes
Clear Instructions	Yes
Cleaning Instructions	Yes
Waterproof Concealed Zip / Zip Cover & Welded Seams	Yes
Waterproof / Water Resistant	Yes
Cushion Infill Moisture Vapour / Heat	The unique top layer reduces heat transfer rates by over 50% and vapour transfer rates by over 25%, thus improving the micro-climate between the patient and the support surface.
Fire Retardant (Min BS5852 & CRIB 5)	Yes
Waterflow Score 10+	Yes
CE Marked	Yes
Quality Standard Compliant	Yes
Positioning Instructions	Yes
ISO 16840 Compliant	Yes
Slip Resistant Base	Yes
Estimated Life Span	5 Years
Replacement Covers	Yes
Warranty	2 Years

#1 ON CONTRACT FOR CUSHION - FOAM GEL FLUID - AT RISK*

KEY FEATURES

* HIGH RISK CUSHION

- Silicone Gel encased in Visco-Elastic Foam
- Anti-Microbial Coating
- Welded Seams
- Multi-stretch Cover
- Water resistant Cover with Support Strap
- Vapour permeable Cover
- 2 year warranty

A pressure reduction surface is required when seated to reduce the risk of pressure ulcers on the buttocks. Gel cushions provide optimum support for patients when in the seated position. The Serenade Gel cushion contains silicone gel which reduces pressure and provides comfort. A support strap is incorporated under the cushion to ensure it stays in situ. The Serenade Gel cushion features welded, waterproof, multi-stretch and vapour permeable cover.

	Serenade
Height of Cushion	8cm

Barton Heel Boot

PRODUCT CODE: BHB-V or BHB-S

KEY FEATURES

- Prevents heel damage in patients
- Fleece lining for comfort and anti-shear
- Easy fitting and removal for quick foot and heel inspection
- Anti-slip sole fabric
- Adjustable Velcro straps
- Sustainable design
- Unique integrated quad cell technology
- Machine Washable at 60 degrees Celsius
- Designed and manufactured in the UK
- 3 sizes available - small, medium, large
- Available in Velco or studs

	Posimed Heel Protect
Size	S/M/L
Conforms to the shape of the Heel	Yes
Pressure Redistribution	Yes
Washable	Yes
Anatomical Fixation Method	Yes
Fully Offloads Heel	Yes
CE Marked	Yes
Instructions	Yes
Single Patient Multiple Use	Yes
External Clinical Evidence Paper	Yes

Both pressure and shear on the heel area are of key importance to clinicians. The prominence of the heel with a patient in bed means that the heel is put under intense pressure. The design of the inflatable portion of the BartonHeel Boot helps to reduce the pressure and also the shear that the heel is under.

The quad cell technology helps ensure a stable platform for the foot and helps keep the in the correct position in comparison to other products on the market. The 2014 European Pressure Ulcer Advisory Panel (EPUAP 2014) guidelines recommend the practise of offloading pressure 'floating heels'.

For patients at 'high risk' of developing pressure ulcers in the susceptible heel area, the Barton-Heel Boot offers a proven method of heel offloading. Whilst patients with existing skin damage will find that the unique design and breathable fabrics allow for effective wound healing.

STRAIGHT STAIRLIFTS

If your staircase is straight and does not have any corners, we offer a fantastic range of straight stairlifts to suit your needs.

HANDICARE 1100

The Handicare 1100 is the slimmest stairlift on the market. The super slim line rail is the narrowest on the market so it obscures less of your stairs than any other straight stairlift system. The Handicare 1100 also features continuous charge functionality, so you can park the seat anywhere you like on the rail and it will stay charged.

HANDICARE 1000

The Handicare 1000 features a range of customisable options including a choice of seat colour and optional powered swivel and footplate.

It is also available in XL and XXL sizes which cater for weights up to 200kg. The 1000 can also be configured with a powered hinge to prevent the track obscuring a doorway.

CURVED STAIRLIFTS

Curved stairlifts have tracks that are specifically designed to suit staircases that turn corners. Customisable options include a choice of seat style, rail colour, upholstery colour and powered options.

HANDICARE 2000

Ideal for short stairs of 5m or less. The compact twin rail curved system is designed for a stable and smooth ride.

Available in 2 seat options; the Simplicity and the Style.

VAN GOGH

This stylish single rail curved stairlift fits on the external side of the staircase and comes with 7m of track and includes two 90° bends as standard. The Van Gogh is ideal for staircases with multiple turns.

REMBRANDT

Similar to the Van Gogh this stylish single rail curved stairlift fits on the internal side of the staircase. It comes with 5m of tracks and includes two 90° bends as standard.

Free Stairlift Assessment Course

We are offering a free CPD course to assist Occupational Therapists when accessing for a stairlift. Please contact your local sales representative to find out more.
